Lorsqu'on a créé la branche annulation, on a constaté que toute les modifications faites à travers cette branche s'affichent dans le GitHub après le push.

Third Step: compare pull Requests

Le merge sera automatique .

Fourth Step: merging en local

```

✓ Après <mark>git branch –a</mark> , on constate que les branches (ajustement et annulation) ont été supprimé .

✓ Les branches supprimées sur <mark>Github</mark> existent encore dans notre repo local .

✓ Aucune modification dans la branche master .

✓ La commande <mark>git fetsh - - all - - prune</mark> nous a permis d'afficher les branches qu'on a supprimé .

Fifth Step: The Cleaning up

Dans cette étape on a créer une branche et faire éditer le fichier Licence ensuite sur Gitbash j'ai fait un pull global en utlisant la command git pull --all et aprés on a fait le merge de laa branche "updatelicence".

Ensuite j'ai executé la command git push et supprimer notre branche et noublie pas de exécutez la commande git bas .

Sixth step: Rebasing

```
$ git branch
* master
